Preface
This year the 9th WSEAS International Conference on MICROELECTRONICS, NANOELECTRONICS, OPTOELECTRONICS (MINO '10) was held in Catania, Italy, May 29-31, 2010. The conference remains faithful to its original idea of providing a platform to discuss microelectronics, nanoelectronics, quantum electronics, biomolecular electronics, optoelectronics etc. with participants from all over the world, both from academia and from industry.

Its success is reflected in the papers received, with participants coming from several countries, allowing a real multinational multicultural exchange of experiences and ideas.

The accepted papers of this conference are published in this Book that will be indexed by ISI. Please, check it: www.worldses.org/indexes as well as in the CD-ROM Proceedings. They will be also available in the E-Library of the WSEAS. The best papers will be also promoted in many Journals for further evaluation.

A Conference such as this can only succeed as a team effort, so the Editors want to thank the International Scientific Committee and the Reviewers for their excellent work in reviewing the papers as well as their invaluable input and advice.

The Editors
### Table of Contents

**Plenary Lecture 1: System-on-Package (SoP) Technologies to Integrate mm-Wave Radio Systems**  
Young Chul Lee  

11

**Contributions to Real-Time Monitoring of Polymer Composites Processing Using Mechanical Impedance Analysis**  
Gheorghe Anza, Marinela Marinescu, Larisa Butu, Claudia Borda, Dan Dobrota  

13

**Design and Implementation of a New Fuzzy Logic Controller**  
R. Amirkhanzadeh, S. Aminifar, M. Daneshwar, Gh. Yosefi  

19

**Design of a New Intelligent CMOS Controller Chip for Control Water Level in Tanks**  
R. Sojoudizadeh, S. Aminifar, M. Daneshwar, Gh. Yosefi  

25

**New Definition of Membership Function and its Hardware Implementation with a New Strategy**  
A. Ebrahimi, S. Aminifar, M. Daneshwar, Gh. Yosefi  

32

**Continuous-Valued Logic & its Application in Soft Controlling**  
W. Aminiazar, S. Aminifar, M. Daneshwar, Gh. Yosefi  

38

**Fast Fourier Transform Analysis on Harmonic Content for SPWM Design and Implementation Based on New Modulation Approach**  
Hanim Hussin, Azilah Saparon, Mohd. Das Risin, Maizan Muhamad  

44

**S-Parameter Analysis of 0.18μm LNA for W-CDMA Application**  
M. Muhamad, N. A. Nordin  

48

**Yellow-Green InGaN-Based Light Emitting Diodes with Emission Peak Wavelength Red Shifts under Low Injection Current**  
Mu-Jen Lai, Liann-Be Chang, Ray-Ming Lin, Ming-Jer Jeng  

52

**The Impact of Varying Temperature on Performance of Carbon Nanotube Field-Effect Transistors**  
Ali Naderi, Parviz Keshavarzi, Hossein Elahipanah  

56

**Implementing of Neuro-Fuzzy System with High-Speed, Low-Power CMOS Circuits in Current-Mode**  
S. Afrang, M. Daneshwar, S.Aminifar, Gh.Yosefi  

61

**Double Gate Nanoscale MOSFET Modeling by a Neural Network Approach**  
Suresh P., Sheela L.  

67

**Formation and Properties of Nanostructured Layers from Amorphous Silicon**  
Yerzhan T. Taurbayev, Gauhar K. Mussabek, Kadyrzhan K. Dyhanbayev, Yeldos A. Svanbayev, Toktar I. Taurbayev, Victor Yu. Timoshenko, Natalia E. Maslova, Kyrill A. Gonchar  

72
Routing Congestion Removing of CMOL FPGA Circuits by a Recursive Method
Hossein Hamidipour, Parviz Keshavarzi, Ali Naderi

Power Efficiency Optimization of Fully Integrated Dickson Charge Pumps
Jan Doutreloigne

CFD Modeling for Component-level Thermal Analysis: Investigation of Thermal Regime of Integrated Circuits and Transistors
Nadezhda Kafadarova, Violeta Chincheva, Anna Andonova

Multi-axis Interferometric System for Positioning in Nanometrology
Josef Lazar, Ondrej Cip, Martin Cizek, Jan Hrabina, Mojmir Sery, Petr Klapetek

Semiconductor Laser Sources at 760nm Wavelength for Nanometrology
Bretislav Mikel, Zdenek Buchta, Josef Lazar, Ondrej Cip

Electrical Characteristics Comparison between Fully-Depleted SOI and n-MOS Devices Investigation Using Silvaco
Yusnira Husaini, Zulhelmi Abu Hasan, Ahmad Sabirin Zoolfakar

Design and Analysis of Low Powered DNA Sequence Alignment Accelerator Using ASIC Design Flow
Rudy Azman Yusoff Cheah, Abdul Karimi Halim, Syed Abdul Mutalib Al Junid, Norhazlin Khairudin

Use the Electromagnetic Field Stress to Study the Reliability of the SiGe HBT

Plenary Lecture 1

System-on-Package (SoP) Technologies to Integrate mm-Wave Radio Systems

Assistant Professor Young Chul Lee
Division of Marine Electronics and Communication Engineering
Mokpo National Maritime University (MMU)
Jeonnam, Korea
E-mail: leeyc@mmu.ac.kr

Abstract: In this lecture, system-on-package (SoP) technologies based on LTCC (low-temp. co-fired ceramic) will be presented for mm-wave radio system applications. The key issues to implement compact SoP modules are the attenuation at the transmission lines and transitions for interconnection between components, crosstalk between them, compact passive devices such as LPF, BPF and antenna, and their integration in SoP modules. Several research approaches have been tried to solve these issues will be presented. Especially, transmission lines and transitions using air cavities integrated in the LTCC substrate are discussed for loss reduction. Resonant behaviors due to 3-D structures are analyzed and structures proposed for their suppression are explained using LTCC modules. Research results of compact 3-D passive devices such as a LPF, BPF, diplexer, and antenna are also in detail presented. Finally, compact-sized 60GHz transmitter, receiver and transceiver LTCC SoP modules integrating LTCC passive components and their link-test results are presented.

Brief Biography of the Speaker:
Young Chul Lee received his B.S. and M.S degrees in electronic engineering from Yeungnam University, Gyeongsan, Korea, in 1995 and 1997, respectively, and Ph.D. degree in electronic engineering from Information and Communications University (ICU), Daejeon, Korea, in 2005. From 1997 to 2000, he was with the R&D Division, LG Semicon Inc., Cheongju, Korea, where he was involved in the development of MOSFET devices for DRAM applications. In 2005, he joined Mokpo National Maritime University (MMU), Mokpo, Korea, as an assistant professor in Division of Marine Electronics and Communication Engineering. His professional interests are millimeter-wave circuits and systems, 3D integration of RF circuits using LTCC based System-in-Package (SiP) technology, and reconfigurable RF circuits based on tunable dielectric thin films.
