**Preface**

This year the 4th WSEAS International Conference on WASTE MANAGEMENT, WATER POLLUTION, AIR POLLUTION, INDOOR CLIMATE (WWAI '10) was held in Kantaoui, Sousse, Tunisia, May 3-6, 2010. The conference remains faithful to its original idea of providing a platform to discuss waste management, water pollution, air pollution, indoor climate etc. with participants from all over the world, both from academia and from industry.

Its success is reflected in the papers received, with participants coming from several countries, allowing a real multinational multicultural exchange of experiences and ideas.

The accepted papers of this conference are published in this Book that will be indexed by ISI. Please, check it: [www.worldses.org/indexes](http://www.worldses.org/indexes) as well as in the CD-ROM Proceedings. They will be also available in the E-Library of the WSEAS. The best papers will be also promoted in many Journals for further evaluation.

A Conference such as this can only succeed as a team effort, so the Editors want to thank the International Scientific Committee and the Reviewers for their excellent work in reviewing the papers as well as their invaluable input and advice.

The Editors

## Table of Contents

<b>Plenary Lecture 1: Wastewater Reuse in Arid Irrigated Areas - Control of Soil Salinity</b>	12
<i>Jose Beltrao</i>	
<b>Plenary Lecture 2: Clean Technology from Waste Management</b>	13
<i>Ioana Ionel</i>	
<b>Possibilities of Greywater Reuse in Non-Potable in Situ Urban Applications, According with its Quality and Quantity</b>	15
<i>Cristina Matos, Ana Sampaio, Isabel Bentes</i>	
<b>River Water Quality Evaluation in China</b>	21
<i>Wai Cheung Ip, Heung Wong, Bao Qing Hu</i>	
<b>Overview on the Separation and Removal of Haloaceticacids in Drinking Water</b>	25
<i>Seyed Mostafa Tabatabaee Ghomsheh, Mohammad Soltanieh, Mahmood Mosavi</i>	
<b>Performance Evaluation of Industrial By-Product Phosphogypsum in the Sorptive Removal of Nickel(II) from Aqueous Environment</b>	32
<i>M. M. El-Tyeb, S. R. Zeeidan</i>	
<b>Hygieia- Domestic Online Monitor of Water Pollution</b>	42
<i>G. Satya Swaroop, P. Rashmi Reddy, Karthik Ravi Teja M.</i>	
<b>Mathematical Analysis for Constant Household Monitor of Water Contamination</b>	47
<i>P. Rashmi Reddy, G. Satya Swaroop, Karthik Ravi Teja M.</i>	
<b>Alternatives for Re-Use of Sludge from Waste Water Treatment</b>	52
<i>Andra Predescu, Ecaterina Matei, Andrei Berbecaru, Mirela Sohaciu, Cristian Predescu, Avram Nicolae</i>	
<b>Oil Spill Simulation in Mouth of Persian Gulf</b>	56
<i>Jamshid Zohre Heydariha, Reza Ghiassi</i>	
<b>Municipal Wastewater Treatment Improvement Using Computer Simulating</b>	61
<i>Stefania Iordache, Petrescu Nicolae, Cezarina Necula, Gabriela Busuioc</i>	
<b>The Effects of the Use of Organic Solid Wastes on the Growth of Citrus Trees</b>	67
<i>Manuel Costa, Jose Beltrao, Joao Carrasco De Brito, Maria Alcinda Neves, Maribela Pestana, Carlos Guerrero</i>	
<b>Arsenic Accumulation in Aquatic Plants (Central Portugal)</b>	73
<i>Joao Pratas, Paulo Favas, Nelson Rodrigues, Majeti Prasad</i>	
<b>Phytofiltration of Uranium by Aquatic Plants of Central Portugal</b>	77
<i>Joao Pratas, Paulo Favas, Nelson Rodrigues, Majeti Prasad, Helena Freitas</i>	

<b>Heat Waves in Subcarpathian and Field Area of the County Dambovita and Their Impact on Agriculture (2000-2007)</b>	81
<i>Gica Pehoiu, O. Murarescu</i>	
<b>Precipitation Fell Maximum of 24 h in the Contact Area Between Targoviste Plain and Subcarpathians of Ialomita (1961-2005)</b>	86
<i>Ovidiu Murarescu, Gica Pehoiu</i>	
<b>Risk Phenomena in the Hydrographic Basin Bizdidel (2000-2007)</b>	90
<i>Ovidiu Murarescu, Gica Pehoiu, Rares Turloiu</i>	
<b>Variability Influence of Water Consumptions on the Stability of Razim – Sinoe Ecosystem</b>	95
<i>Petrescu Nicolae, Stefania Iordache, Gabriela Busuioc, Cezarina Necula</i>	
<b>Aspects Regarding the Environmental Issues in Dambovita County (Romania)</b>	100
<i>Dumitru Felicia, Georgiana Dinca, Gratiela Gavrilă, Gabriel Badea</i>	
<b>Human Pressure Exerted on the Use of Land in Targoviste Plain</b>	104
<i>Mihaela Sencovici, Gica Pehoiu</i>	
<b>Observations on Air Pollution with Particulate Matter in the Area of the Industrial Platform of Targoviste City</b>	108
<i>Loredana Beatrice Neagu Frasin, Aurelia Corina Cosac, Sofia Teodorescu</i>	
<b>Uranium Removal in Artificial Wetlands</b>	112
<i>Joao Pratas, Nelson Rodrigues, Filipe Alves, Joao Patricio</i>	
<b>Causes for Uranium Immobilization in a Portuguese Stream</b>	118
<i>Joao Pratas, Nelson Rodrigues, Lys Tavares, Andre Branches</i>	
<b>Performance Evaluation of Portuguese Constructed Wetlands for Municipal Wastewater Treatment</b>	124
<i>Antonio A.L.S. Duarte, Teresa Canais-Seco, Jose A. Peres, Isabel Bentes, Jorge Pinto</i>	
<b>Research on Pollution with Heavy Metals of Ialomita River in the Year 2009</b>	130
<i>Gheorghe Ionita, Loredana Beatrice Neagu Frasin, Sofia Teodorescu</i>	
<b>The Research of Presence and Behaviour of Heavy Metals in Water Environment of Skadar Lake (Serbia &amp; Montenegro)</b>	134
<i>Aleksandar Duborija, Vuko Strugar, Nina Duborija</i>	
<b>Characterization of Steel Mill Electric-Arc Furnace Dust</b>	139
<i>Cristiana-Zizi Rizescu, Zorica Bacinschi, Elena-Valentina Stoian, Aurora-Anca Poinescu</i>	
<b>The Impact of Human Activities on Ialomita River Quality</b>	144
<i>Aurelia Corina Cosac, Loredana Beatrice Frasin, Sofia Teodorescu</i>	
<b>Observations on the Inland Rivers State in Ialomita River Basin</b>	148
<i>Loredana Beatrice Neagu Frasin, Aurelia Corina Cosac, Sinziana Venera Morarita, Sofia Teodorescu</i>	
<b>Tidal and Spatial Changes in Nitrogen Species in a Costal Lagoon (South Portugal) Related to Anthropogenic Effects</b>	151
<i>L. Meyers, P. Pedro, J. Beltrao, C. Gliesche, L. Dionisio</i>	

<b>Clean Technology from Waste Management</b>	155
<i>Ionel Ioana</i>	
<b>Increasing the Quality of Water Pipe Network Systems by Tracing the Vulnerability</b>	172
<i>Jorge Pinto, Luis Afonso, Joao Varajao, Isabel Bentes, Humberto Varum, Antonio Duarte, Jitendra Agarwal</i>	
<b>Converting Waste Animal Fats into Energy Sources</b>	177
<i>Popescu Francisc, Ionel Ioana, Lontis Nicolae Stelian</i>	
<b>Authors Index</b>	181

## Plenary Lecture 1

### Wastewater Reuse in Arid Irrigated Areas - Control of Soil Salinity

**Professor Jose Beltrao**  
University of Algarve  
Campus de Gambelas, 8005-139 Faro  
PORTUGAL  
E-mail: jbeltrao@ualg.pt

..... Due to the lack of water around the arid areas, potable water luxurious uses - are increasingly contested. In order to solve this problem, non conventional water resources, like treated wastewater, gained increasing role in the planning and development of additional water supplies in irrigated areas. Hence, wastewater recycling should be more implemented, especially in arid and semiarid regions, where the water shortage is an important limiting factor for the economy, in order to avoid drastic measures of consumers selection. In most cases, the intense use of effluent for irrigation attracted public awareness in respect of contaminating pathogens, heavy metals, salts and other chemicals. For safe wastewater reuse in irrigation is generally used the tertiary effluent, without advanced treatments (like membrane technologies) due to their high costs. Therefore, wastewater will conserve its salinity, contaminating irrigated soils and decreasing plant growth. The objective of this work is to present techniques used to control soil salinity, according to the sustainability of the soil and water conservation in arid irrigated areas. These techniques include the conventional techniques (leaching, salts plus fertilizers combination and the use of salt tolerant crops) and environmentally safe and clean procedures (salt removing species, drought tolerant crops and visual appearance). Results of the application of these techniques are presented. It may be seen that clean procedures may be not enough to solve the salinity problems. Hence, it is concluded that the clean and environmental safe procedures salinity could be associated to the conventional techniques, combining environmental, economical and social aspects, contributing, therefore, to increase the sustainability of irrigated areas and plant growth.

## Plenary Lecture 2

### Clean Technology from Waste Management

#### **Professor Ioana Ionel**

Director Dep. MMUT, Director Centru Cercetare  
Universitatea POLITEHNICA Timisoara  
Facultatea de Mecanica  
Departament Masini Mecanice, Utilaje si Transporturi  
Bv. M. Viteazu 1, 300222, Timisoara, ROMANIA  
E-mail: ioana.ionel@mec.upt.ro

Waste is representing an important environmental pollution source, not only for the soil and ground water, but also for the air. Deposit in open land fields is not allowed according European standards and the EU countries have met national regulations to close the existing non-ecological deposits and turn them into ecological ones. Also the general management for the waste is to be accordingly re-evaluated and shaped in a novel. Manner. Waste is representing also an energy source, that should be not wasted. The waste (mainly municipal waste) must be properly reused as it represents material and energy content, Combustion , fermentation and recycling are possible solution for turning the waste management into a business, also reducing simultaneously the environmental damages risen by the enormous waste quantities, nowadays. The presentation will focus on clean combustion and co-combustion of waste, and on technologies to turn the energy content of the waste into other cleaner energy sources, such as combustible gas. One will rise attention also about the barriers - technical and mental - to apply correct waste management. And to the consequences of not given by the society the correct input to this matter. Examples from the author's experience and literature will elucidating the conclusions.

Ioana IONEL is professor at the "POLITEHNICA" University of Timisoara from Romania and guest professor at the Technical University from Munich, Germany. Her scientific development was mainly influenced by two events: PhD degree awarded 1987 and the Alexander von Humboldt fellowship, starting 1991. She has as main area of expertise for teaching and research topics concerning Thermodynamics, Clean Combustion, Environmental protection and Renewable Energy applications. 2001 she habilitated based on a thesis and research concerning the quality of air, methods for investigations and clean technologies' applications for power plants. She is leader and director of a specialized research centre and department (<http://www.mec.upt.ro/~dep4>), consisting of different ISO 17025 attested labs, mainly the air quality ([www.mediu.ro](http://www.mediu.ro)) monitoring and renewable energy resources are to be mentioned (<http://energieregen.mec.upt.ro>). She is author of several books in Romanian, German and English, notable are the recent series of literature authored or coordinated concerning renewable energy resources such as biomass, biofuels, biogas, bioenergy in general. Her activity consists both in lecturing at home and abroad, as invited professor, also for summer schools. Numerous research project, on national or European/international level have been coordinated, as well as expertise grants are offered to the private industrial sector. The coordination of PhD students is also notable.
